Nespelem Meets Google

Nespelem Web News October, 2009 Vol 1 No. 1

<http://my.nsdeagles.org>

Welcome to NSD meets Google !

With Google Apps, we'll gain the benefits of a robust and innovative feature set -- including the ability to access document "Google Apps" services from any computer -- as well as lower infrastructure and support costs.

Google Apps is a Google Service that features several web applications similar to traditional office suites.

The applications are available through any computer with an internet connection.

The applications include: documents (documents, spreadsheet, presentations, forms), calendar, and sites.

Help

Just ask for help; we want you to be successful.

sheri@my.nsdeagles.org

Both Google Videos and NSD Videos provide you with the information you need to succeed at creating:

- documents such as word, spreadsheets, forms, presentations -- all online and available wherever you are connected to the Internet
- sites such as a portfolio page or project or club web page.

Internet Tips

1. Always be positive. Your written words are all the reader has -- no tone or facial expression-- so choose carefully.
2. Consider whatever you email or create on the Internet to be permanent.
3. Remember: Permanent and visible, even when in a private area (others have access to share).
4. In your contacts with the public, YOU, for the moment, represent the Nespelem School District. The District's reputation with the public is at stake whenever you come in contact with them. We have everything to gain by being courteous, friendly, and helpful...
5. Reveal no personal information.
6. Respect for staff, students, parents and all others you come in contact with is essential.
